

# Monkey Creek Cafe & Pantry

When Karol Kukeski of Australian Makers Marketplace took over the Monkey Creek Cafe in Dargan she engaged Central West Graphic Design to help her bring her vision to life.

The first job was to tweak the logo that was acquired with the business.

The next job was to design wall art for the premises which reflected everything they offered at their very unique venue.

After a very comprehensive brief, we took on the challenge and designed a massive installation which adorned the major wall above a window.

A blackboard was also designed to describe the kind of offerings that were available at the cafe pantry.

Karol was great to work with and was very happy with the result and how it lifted the decor of her business.
